

Baylor, age 7

A MATCH FOR BAY

BE THE ONE TO SAVE A LIFE

Baylor is in need of a marrow donor.

Baylor is a cheerful & energetic 7 year-old. He battled leukemia 2 years ago & beat it. The family recently found out he relapsed. Baylor is undergoing treatment, but will need a bone marrow transplant to survive. Since Baylor is Japanese & German mixed race, he will most likely match a donor who is also mixed race, Asian & Caucasian. #HAPA

REGISTER TODAY!

IT TAKES ONLY 10 MINUTES!

You might be able to match Bay or any other of the 12,000 patients around the world.

You'd need to:

be between the ages of 18 & 44
complete consent form
provide a cheek swab
